

Nevins Launches Cue Low Storage Collection

Houston, TX - October 19, 2016

Nevins is proud to introduce the Cue Low Storage Collection. This Collection is comprised of mobile pedestals, floor credenzas, and wall-mounted credenzas.

Designed by David Murphy, *"Cue was developed to satisfy the growing need for a multi-purpose credenza in today's changing workspace. One that would not limit storage, but remain compact and adaptable."*

Nevins has taken the sturdy craftsmanship and versatility of their Union Storage and Presentation Collection and expanded it into a modern minimalistic low storage Collection that meets the needs of today's evolving workspace. The addition of Cue has allowed Nevins to venture from the traditional conference room into other workspace areas. Now, Cue can not only meet your storage needs for conference rooms, but offers storage solutions for collaborative spaces, break out spaces, private offices, and benching systems. Wall mounted is perfect for a conference room or that breakout space where space restriction can pose a unique challenge. Having a large standard product offering in this collection gives us the exceptional ability to design products for every need.

Cue was created with a minimalistic zest that allows for storage combinations that enhance and accent any setting. Cue's unique two-tone appearance is created by its $\frac{3}{4}$ " veneer/laminate wrap which encases the units.
