

Nevins Introduces Thro Waste and Recycling unit

Houston, TX - August 1, 2015

Designed by David Murphy, the Thro free standing recycling center is a large capacity receptacle system that offers high functionality in a modern design. With Thro's multitude of selections and customized labels, this unit is great for any spaces or where you want to promote recycling. Thro eliminates the need to lift heavy bags and liners with an efficient and convenient front door sliding feature with optional locks.

Place a **Thro** in your workspace and Nevins guarantees it will function beautifully, efficiently, and durably.
