Nevins Launches Brooklyn II Bench

Houston, TX - November 18, 2013

Nevins hired Robert Silarski Eno to create a complete line of New York inspired benches. This carefully crafted bench collection provides aesthetically inviting seating for public spaces in need of that extra element of design.

“Brooklyn II is the union of form and function. Essentially, this is modern art that still holds function as it’s upmost priority.”

Brooklyn II by Nevins floats on slender steel legs while providing a beautiful setting for those nearby. Brooklyn II is a smart combination of metal, wood and upholstery.

The exquisite floating form combined with thoughtful elegance can uplift the elegance in an environment. Brooklyn II benches are available in two widths and depths, as well as with eight veneers, including walnut, cherry, maple and mahogany.

-Christina Goodwin
Director of Marketing
